

SUDS Online @ Abertay – Now Two Courses

Following the success of SUDS online for the past eight years we have decided to expand the range of courses we offer to give a better service to our many clients. This has been made easier through the award of a European grant under the Interreg North Sea IVB programme.

What are the titles of the two new courses?

1. **SUDS Concept & Design Principles**
2. **SUDS Operation & Maintenance**

What are the two new courses about?

1. **SUDS Concept & Design Principles (formerly SUDS Online)**
Background to SUDS; storage and treatment; levels of risk; layout and other urban elements; SUDS components; sizing criteria; treatment train; levels of treatment; survivability; design methods.
2. **SUDS Operation & Maintenance (This is a new Pilot)**
Urbanisation & Water / What is Sustainable Drainage? / Common SUDS Techniques / Inspection and Maintenance: What is it, why is it necessary and what is involved? / Inspection and Maintenance: The Nuts and Bolts / Health and Safety.

Who should enrol?

The courses are designed both for experienced staff wishing to inform themselves about SUDS systems, and for younger professionals who require a basic knowledge of modern approaches to drainage systems.

- Design engineers requiring the additional knowledge of SUDS systems
- Environmental and local authority planners and engineering staff
- Developers and housebuilders needing to comply with latest good practice
- Architects and landscape architects seeking to incorporate drainage into the natural environment

What you need

- You will probably have a degree in science, engineering or other appropriate discipline
- A desktop PC and access to the Internet
- The enrolment fee of £400 for course 1
- The enrolment fee of £200 for course 2 (introductory offer for the pilot course)

What you get

- The latest thinking on SUDS planning, implementation and design
- Online access to the course tutor at the University of Abertay Dundee
- Rapid response to questions and problems
- A range of case study examples of SUDS systems, which have been implemented
- Hundreds of photographic images

New!!! - From 20th September 2010 we will be offering a new MSc Programme by distance learning. The title of this programme is '**MSc in Urban Water Planning**' and if you are interested in SUDS Online then you should also be interested in our new MSc programme.
